

Join Us May 10th **GREEN** Innovation Day

Accelerating Your Transformational Projects With Automation

Discover how Emerson develops and delivers technologies, software, and services to address operational challenges, energy efficiency, emissions management and low carbon clean fuels.

Gain insight into the technologies and solution that are enabling manufacturers, technology providers, and system integrators to achieve new levels of performance. Join us at our exclusive event, **Green Innovation Day: Automation Technologies to Support Sustainable and Digital Projects.**

Don't miss this opportunity to network with peers and local Emerson experts and learn how new technologies can improve your operational KPIs across production optimization, reliability, safety, and energy management.

| 4:30 pm | Refreshments & Technology Demonstrations |

Join Us May 10th

GREEN Innovation Day

Optimizing Your Digital Transformation and Sustainability Projects With Automation Technologies

Discover how Emerson develops and delivers technologies, software, and services that improve efficiency, and safety.

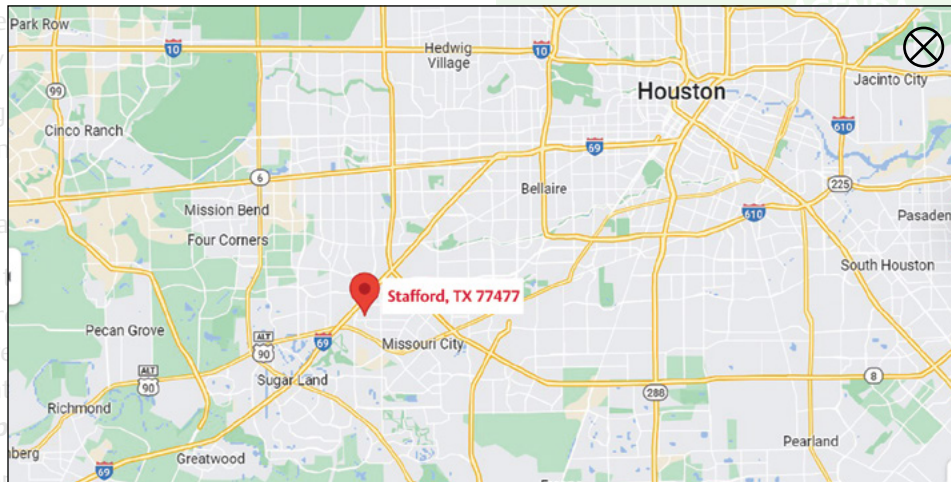

The key is addressing challenges, operational efficiency, waste and low carbon electrification.

Gain insight into the enabling manufacturing integrators to achieve at our exclusive event.

Technologies to Support

Don't miss this opportunity to meet with local Emerson experts and learn how new technologies can improve your operational KPIs across production optimization, reliability, safety, and energy management.

TECHNOLOGY BREAK-OUT SESSIONS

Break-out Room A

- 1:00 pm *Utilizing Data Management Systems to Develop a Carbon Intensity Tracker*
- 1:30 pm *Greening by Using DeltaV's Electronic Marshalling and Virtualization Technologies*
- 2:00 pm *Measurement Challenges for Carbon Capture*
- 2:30 pm *Predicting and Controlling Emissions Better With Emerson's AI-Powered PEMS (Predictive Emissions Monitoring System)*
- 3:00 pm *Greening Your Process Equipment Starts One Valve at a Time: Part 1 Addressing Fugitive Emissions*
- 3:30 pm *Greening Your Process Equipment Starts One Valve at a Time: Part 2 Addressing Vented Emissions*
- 4:00 pm *Greening Your Process Equipment Starts One Valve at a Time: Part 3 Documenting Value to Justify the Investment*

Break-out Room B

- 1:00 pm *Keeping Your Green Diesel Investments Evergreen*
- 1:30 pm *Increasing Biofuel and Renewable Diesel Plant Margins and Reducing Their Sustainability Impact With the Help of Emerson's Analytics*
- 2:00 pm *Advancing Loading/Unloading of Green Diesel Using a Modern Engineered Solution*
- 2:30 pm *Overcoming Measurement Challenges Across the Hydrogen Value Chain*
- 3:00 pm *The Greener Future of Hydrogen Production With Edge Control*
- 3:30 pm *Achieve Plant Sustainability Goals Using Data Management, AI and Analytics Software*
- 4:00 pm *Remote Monitoring Software to Verify Measurements and Comply With Regulations*
